

Soil Health Field Day

Soil structure is a key component of soil health. Soil is capable of resisting compaction, infiltrating large rainfall events and limiting loss by erosion. Join us to learn the steps necessary to promote the development of beneficial soil structure in your fields!

August 13, 2021

Registration begins— 9:15 A.M. Program— 9:30-11:00 A.M.

Seymour Township, Lafayette County

11326 Prairie Road
