

2021 Wisconsin Pest Management Update Meetings

In-Person Events Cancelled - Virtual Offering Only

After much deliberation, we made the difficult decision to pivot the **2021 Wisconsin Pest Management Update Meetings** from a hybrid model to all virtual because of continued COVID-19 concerns and low registration numbers. Thus, the in-person events at Darlington (November 16, 2021), Chippewa Falls (November 17, 2021) and Kimberly (November 18, 2021) are now cancelled.

We will maintain the virtual offering on **Friday November 19th (9:00 AM to Noon)** and are adding a second virtual offering of the same program on **Tuesday November 16th (1:00 PM to 4:00 PM)** so participants can pick the option that best fits their schedule.

To register for one of the virtual events, please go to the following link: <https://go.wisc.edu/8tufvc>

This year's speakers will include:

- Mark Renz, Perennial Cropping Systems Extension Weed Specialist
- Rodrigo Werle, Annual Cropping Systems Extension Weed Specialist
- Nick Arneson, Extension Outreach Specialist, weeds
- PJ Leisch Extension Entomology Diagnostician
- Damon Smith, Extension Field Crops Pathologist

Topics will include updates in the area of weed, pest, and disease management along with a panel discussion and Q&A regarding the pest management challenges related to planting soybeans early. Three (3) Pest Management CCA CEUs have been requested for this event. Registration includes PDF of A3646 Pest Management In Wisconsin Fields.

*We apologize for any inconvenience this decision may cause.
